Set

[Josh, Martin, Venkat, null]

a set with nullable elements can have a single null value

[Josh, Martin, Venkat, null, Andrei, Roman]

```
val names: Set<String?> = mutableSetOf("Josh", "Martin", "Venkat", null, null)
```

println(names)

```
val otherNames = setOf("Andrei", "Roman")
```

```
val allNames = names union otherNames
```

```
println(allNames)
```

Set

a set with nullable elements can have a single null value

```
val names: Set<String?> = mutableSetOf("Josh", "Martin", "Venkat", null, null)
println(names) [Josh, Martin, Venkat, null]

val otherNames = setOf("Andrei", "Roman")
