```
longWords.forEach { print("$it ") }
```

```
longWords.forEach { print("$it ") }
```

```kotlin
val longWords = words
    .onEach { print(it) }
    .filter { it.length > 5 }
```

```kotlin
val longWords = words
    .onEach { print(it) }
    .filter { it.length > 5 }
```

```
longWords.forEach { print("$it ") }
```

```
longWords.forEach { print("$it ") }
```

Sequences

are lazy

```kotlin
val words: List<String> = listOf("tech", "radar", "on", "kotlin", "android", "101")
```

```kotlin
val longWords = words.asSequence()
    .onEach { print(it) }
    .filter { it.length > 5 }
```
